

For Pension Justice *it has to be* **Spiller!**

When it comes to our pensions, NJEA members know what a difference a governor can make. Under Gov. Chris Christie, pension payments were neglected and pension benefits were slashed. **The damage was devastating.**

Under Gov. Phil Murphy, pensions are finally being fully funded, for the first time in decades. Over his seven years in office, he has turned the tide in our favor and set the stage for making even more pension progress.

But there is still much work to do, and New Jersey's NEXT governor will determine whether we continue to move forward toward true pension justice for ALL members, or whether we are threatened with even deeper cuts and a return to the irresponsible funding failures of the past.

NJEA President Sean Spiller is the ONLY candidate for Governor we can count on to fight for pension justice from Day One!

- He understands the damage that has been done by forcing all new members into the inferior Tier 5.
- He understands that DCRP is not a pension and does not provide even basic security in retirement.
- He doesn't blame you for the failures of politicians. He understands that you've NEVER missed a single pension payment, and it is only the state's past irresponsibility that has left us with the unjust system we have today.
- He understands that pensions are a solemn promise that the state has to keep.
- Most importantly, he is committed to working with all stakeholders to create a stronger, fairer and better funded pension system that we can count on when we finish our careers.

*If pension justice matters to you, then join the campaign to elect NJEA's endorsed candidate for governor, **Sean Spiller!***

This work is important, and nothing important is easy. NJEA members will work as long as necessary to achieve the pension justice we all deserve. **Please be part of our progress by becoming a Pension Justice Advocate today!**
